

Supported Living Services

This project provides a comprehensive service for adults with mental health, autism and learning disabilities. Following a full assessment and preparation of a care plan, care packages are tailored around the clients needs.

The aim is to provide an environment as near as possible to independent living, whilst benefiting from the availability of unobtrusive support and care as required, to develop personal, social and domestic skills.

Those placed within this scheme will usually live within a small group of well appointed units and will be supported 24 hours a day by staff available within the same building and some properties have disabled access and wheelchair accessible rooms and communal areas.

This well established Supported Living arrangement has proven to be the most successful, as it also promotes, encourages and achieves a feeling of privacy, dignity and independence to the service user.

Under the Registered Manager, each person's accommodation is fully furnished, benefits from all modern facilities and is well located to enable easy access to amenities.
